9	B	19	GRACE	29	B	39	A	49	B
10	C	20	B	30	D	40	B	50	B

Error Report & Grace Mark Recommendation

Each question carries 2 marks.

Error 1: Original Question 5

Question: Which of the following is always true?

- A) $438 \times 0 = 438$
- B) $438 + 0 = 438$
- C) $438 - 438 = 1$
- D) $438 \div 1 = 438$

Issue: The question has two correct answers. Both **B** and **D** are always true. Therefore, the question does not have a unique correct option.

Recommendation: Award **2 grace marks** to every candidate.

Error 2: Original Question 44

Question: Which statement is NOT correct?

- A) $\text{₹}5 = 500 \text{ paise}$
- B) $\text{₹}10 = 1000 \text{ paise}$
- C) $\text{₹}8 = 800 \text{ paise}$
- D) $\text{₹}12 = 1200 \text{ paise}$

Issue: All four statements are correct because $\text{₹}1 = 100 \text{ paise}$. There is no incorrect option, so the question cannot be answered as written.

Recommendation: Award **2 grace marks** to every candidate.

Final Recommendation

Since there are two erroneous questions and each question carries 2 marks, every candidate should receive **4 grace marks** (2 marks for each erroneous question), regardless of the option selected.
