

Class 4 — Set B

Mateng EduFest 2026

1. A student is asked to write the number that comes immediately before 1,00,000. What should be the answer?

- A) 99,999
- B) 1,00,001
- C) 99,990
- D) 90,999

2. Which of the following numbers has the same face value and place value of the digit 8?

- A) 80
- B) 8
- C) 800
- D) 8000

3. A 12-litre water container is $\frac{3}{4}$ full. After 2.5 litres of water are removed, how much water remains?

- A) 5.5 L
- B) 6.0 L
- C) 6.5 L
- D) 7.5 L

4. A student forms the smallest number using the digits 0, 3, 4, 6, and 9 as 03469. Why is the answer incorrect?

- A) Zero is not a digit.
- B) A number cannot begin with 0.
- C) 9 should be written first.
- D) 3 should be written last.

5. Rina says, "35 is a prime number because it is odd." Which fact proves her wrong?

- A) 35 is divisible by 5.
- B) 35 is an even number.
- C) Every odd number is prime.
- D) 35 has only two factors.

6. Which property of addition states that changing the order of addends does not change the sum?

- A) Identity Property
- B) Commutative Property
- C) Associative Property
- D) Distributive Property

7. The school hall is numbered 40 in Roman numerals. Which of the following is correct?

- A) XXXX
- B) XL
- C) LX
- D) VL

8. A number is divided by 10. Which statement is correct?

- A) The ones digit forms the quotient.
- B) The ones digit forms the remainder.
- C) The tens digit forms the remainder.
- D) The quotient is always one digit.

9. A number has a face value of 5 and a place value of 50. Its predecessor is 349. What is the number?

- A) 348
- B) 349
- C) 350
- D) 351

10. A gardener plants 36 saplings equally in 6 rows. Which statement is true?

- A) 6 is a factor of 36.
- B) 36 is a factor of 6.
- C) 6 is a multiple of 36.
- D) 36 is a prime number.

11. Which of the following numbers is exactly divisible by both 3 and 5?

- A) 52
- B) 60
- C) 67
- D) 73

12. While forming the smallest 4-digit number using the digits 0, 2, 5 and 9, where should 0 be placed?

- A) At the beginning
- B) At the end
- C) After the smallest non-zero digit
- D) Before the largest digit

13. Which number is neither prime nor composite?

- A) 0
- B) 1
- C) 2
- D) 3

14. A ribbon is 3 m 40 cm long. Meena cuts 90 cm from it. What is the length of the remaining ribbon?

- A) 2 m 30 cm
- B) 2 m 40 cm
- C) 2 m 50 cm
- D) 3 m 30 cm

15. Three students make the following statements:P: Every prime number has exactly two factors.Q: Every even number is composite.R: Every number is a factor of itself.Who is correct?

- A) P only
- B) P and R only
- C) Q and R only
- D) P, Q and R

16. In the number 6,48,215, the face value of 8 is 8, and the sum of its place value and face value is:

- A) 88
- B) 808
- C) 8,008
- D) 80,008

17. Which statement about factors is correct?

- A) Every number has infinitely many factors.
- B) Every factor is smaller than the number.
- C) Every number is a factor of itself.
- D) Factors are always prime numbers.

18. Which Roman numeral is written correctly?

- A) VV
- B) IC
- C) XL
- D) XD

19. Which Roman numeral is written correctly according to the rules?

- A) VX
- B) IL
- C) XL
- D) VV

20. Aman is asked to form the smallest 4-digit number using the digits 0, 5, 8, and 2. Which number should he write?

- A) 0582
- B) 2058
- C) 2508
- D) 2850

21. Four students made the following statements about fractions and measures. Who is correct?P: Every improper fraction is greater than 1.Q: 1 kilogram = 1000 grams.R: 1 litre = 1000 millilitres.S: Every decimal number is less than 1.

- A) P and Q only
- B) Q and R only
- C) P, Q and R only
- D) P, Q, R and S

22. Which of the following statements is always true?

- A) Every odd number is prime.
- B) Every even number is composite.
- C) Every number is divisible by 1.
- D) Every prime number is odd.

23. A student says, "Every factor of a number is less than the number." Which fact proves that the statement is incorrect?

- A) 1 is a factor of every number.
- B) Every number is a factor of itself.
- C) Prime numbers have two factors.
- D) Factors divide exactly.

24. Which statement is NOT always true?

- A) Every prime number has exactly two factors.
- B) Every composite number has more than two factors.
- C) Every odd number is prime.
- D) Every number is divisible by 1.

25. In the subtraction $856 - 239 = 617$, the number 239 is called the:

- A) Difference
- B) Minuend
- C) Subtrahend
- D) Product

26. Riya writes the number 5,04,783. Her teacher asks for the place value of the digit 4. What should she write?

- A) 4
- B) 40
- C) 4,000
- D) 400

27. A shopkeeper has 5 kg of sugar. He packs it equally into 8 packets. Which decimal best represents the weight of sugar in each packet?

- A) 0.25 kg
- B) 0.50 kg
- C) 0.625 kg
- D) 0.75 kg

28. Which of the following methods can be used to find the prime factorisation of a number?

- A) Division method only
- B) Factor tree method only
- C) Both A and B
- D) Repeated subtraction method

29. When 0 is added to a number, the result is:

- A) 0
- B) Double the number
- C) Half the number
- D) The same number

30. Which of the following statements is always true about equivalent fractions?

- A) They have the same numerator only.
- B) They have the same denominator only.
- C) They represent the same value, though their numerators and denominators may be different.
- D) They are always proper fractions.

31. While arranging books, a librarian finds that there are 48 books on a shelf. Which statement is correct?

- A) 48 is an odd number.
- B) 48 is divisible by 2.
- C) 48 is a prime number.
- D) 48 has only two factors.

32. A cake is cut into 8 equal pieces. Rina eats 3 pieces. What fraction of the cake is left?

- A) $\frac{3}{8}$
- B) $\frac{5}{8}$
- C) $\frac{3}{5}$
- D) $\frac{8}{3}$

33. Which of the following Roman numerals cannot be repeated?

- A) I
- B) X
- C) V
- D) C

34. Which of the following measurements is correctly matched with the object?

- A) Weight of a pencil — kilogram
- B) Capacity of an ink bottle — litre
- C) Length of a football field — metre
- D) Distance between two cities — centimetre

35. A student multiplies an odd number by an even number. The product will always be:

- A) Odd
- B) Even
- C) Prime
- D) 1

36. Which of the following statements is correct?

- A) $\text{Odd} \times \text{Even} = \text{Odd}$
- B) $\text{Odd} \times \text{Odd} = \text{Even}$
- C) $\text{Odd} \times \text{Even} = \text{Even}$
- D) $\text{Even} \times \text{Even} = \text{Odd}$

37. Which statement correctly describes decimal numbers?

- A) Every decimal number is greater than 1.
- B) A decimal point separates the whole number part from the fractional part.
- C) Decimal numbers cannot be compared.
- D) Every decimal has only one digit after the decimal point.

38. A bottle contains 2.5 L of juice. If 0.75 L is poured out, how much juice remains?

- A) 1.25 L
- B) 1.50 L
- C) 1.75 L
- D) 2.25 L

39. A number is divided by 10, and the remainder is 8. Which digit must be in the ones place of the number?

- A) 0
- B) 5
- C) 8
- D) 9

40. Two school bells ring every 8 minutes and 12 minutes. If they ring together now, after how many minutes will they ring together again?

- A) 16
- B) 20
- C) 24
- D) 48

41. A shopkeeper records the weight of rice in kilograms instead of grams because:

- A)** Kilogram is a larger unit suitable for heavier objects.
- B)** Gram is used only for liquids.
- C)** Kilograms are smaller than grams.
- D)** Weight can only be measured in kilograms.

42. While checking the additional property, Pooja adds 0 to 856. What will be the result?

- A)** 856
- B)** 0
- C)** 857
- D)** 1,712

43. In $925 - 478 = 447$, the number 478 is called:

- A)** Minuend
- B)** Difference
- C)** Subtrahend
- D)** Quotient

44. If the predecessor of a number is 299, what is its successor?

- A)** 299
- B)** 300
- C)** 301
- D)** 302

45. Which of the following numbers has an odd number of factors?

- A)** 18
- B)** 20
- C)** 25
- D)** 30

46. A rope is cut into 6 equal pieces without any part left. Which statement must be true?

- A)** 6 is a factor of the total length.
- B)** 6 is a multiple of the total length.
- C)** The total length is prime.
- D)** The total length is odd.

47. Which of the following is the greatest factor of 48?

- A)** 24
- B)** 16
- C)** 48
- D)** 1

48. Prime factorisation of a number means expressing it as:

- A)** The sum of prime numbers
- B)** The product of prime factors

- C)** The difference of prime numbers
- D)** The multiples of prime numbers

49. The face value of a digit is:

- A)** Its value according to its position
- B)** Always equal to the digit itself
- C)** Always greater than its place value
- D)** Different in every number

50. While rounding 4,867 to the nearest ten, what will be the rounded number?

- A)** 4,860
- B)** 4,870
- C)** 4,900
- D)** 4,800
