

Class 5 — Set B

Mateng EduFest 2026

1. Which of the following statements is true?

- A) 0 is a factor of every number.
- B) Every number has at least two factors.
- C) A factor and a multiple of a number can be the same number.
- D) The number 1 has no factors.

2. A man spent $\frac{1}{4}$ part of his income on food, $\frac{2}{3}$ part on rent and the remaining ₹630 on other expenses. His house rent is

- A) ₹5040
- B) ₹3520
- C) ₹4840
- D) ₹4458

3. Which of the following fractions is in its simplest form?

- A) $\frac{6}{12}$
- B) $\frac{9}{15}$
- C) $\frac{7}{8}$
- D) $\frac{12}{20}$

4. Thirty percent of a number is equal to:

- A) A number greater than the original number
- B) A number that is 30 less than the original number
- C) $\frac{7}{10}$ of the number
- D) $\frac{3}{10}$ of the number

5. When the Selling Price and Cost Price are equal, it is called:

- A) Profit
- B) Loss
- C) No Profit, No Loss
- D) Discount

6. Siddhant spent $\frac{5}{8}$ of his time studying Hindi. He spent $\frac{4}{5}$ as much time studying Mathematics as Hindi. What fraction of Siddhant's study time was spent studying Mathematics?

- A) $\frac{1}{2}$
- B) $\frac{3}{5}$
- C) $\frac{11}{12}$
- D) $\frac{3}{7}$

7. Twenty-six and twenty-six hundredths is written as

- A) 2626
- B) 26.26
- C) 262.6
- D) 2.626

8. The selling price of 6 pens is equal to the cost price of 7 pens. Find the gain per cent or loss per cent.

- A) Gain, $14\frac{2}{7}\%$
- B) Loss, $33\frac{1}{3}\%$
- C) Gain, $16\frac{2}{3}\%$
- D) Loss, $7\frac{1}{7}\%$

9. A pair of twin primes consists of:

- A) Two numbers whose difference is 2
- B) Two numbers having 1 as their only common factor
- C) Two prime numbers whose difference is 2
- D) Two prime numbers having the same number of factors

10. Simplify: 5 of 240 = 150% of x.

- A) 625
- B) 600
- C) 800
- D) 880

11. A vendor buys oranges at 9 for ₹10 and sells them at 12 for ₹16. Find his gain per cent.

- A) 15
- B) 20
- C) 18
- D) 25

12. The term "percent" means:

- A) Per ten
- B) Per hundred
- C) Per thousand
- D) Per two hundred and fifty

13. In buying and selling, a loss occurs when:

- A) Cost Price > Selling Price
- B) Selling Price > Cost Price
- C) Selling Price = Cost Price
- D) Loss > Profit

14. Which of the following represents a profit situation?

- A) Bought for ₹50 and sold for ₹40
- B) Bought for ₹30 and sold for ₹50
- C) Bought for ₹60 and sold for ₹50
- D) Bought for ₹40 and sold for ₹40

15. If the rate of interest increases, the simple interest will:

- A) Decrease
- B) Remain unchanged
- C) Increase
- D) Become zero

16. Which of the following statements is true?

- A) The smallest factor of a number is the number itself.
- B) 1 is a multiple of every number.
- C) Multiples of a number are infinite in number.
- D) Every multiple of a number is always greater than the number itself.

17. If ₹1 becomes ₹9 in 60 yr at simple interest, find the rate per cent per annum.

- A) $3\frac{1}{3}\%$
- B) $33\frac{1}{3}\%$
- C) $3\frac{3}{4}\%$
- D) $13\frac{1}{3}\%$

18. Which of the following is a correct proportion?

- A) $1 : 2 = 1 : 3$
- B) $2 : 4 = 3 : 4$
- C) $3 : 5 = 12 : 20$
- D) $5 : 6 = 6 : 7$

19. If the numerator and denominator of a fraction are equal, then the value of the fraction is:

- A) 0
- B) 1
- C) Less than 1
- D) Greater than 1

20. The successor of the largest five-digit number is:

- A) The smallest five-digit number
- B) The largest six-digit number
- C) The smallest six-digit number
- D) The largest five-digit number

21. Maganlal, a worker, makes an article every $\frac{2}{3}$ h. If he works for $7\frac{1}{2}$ h, how many articles will he make?

- A) $11\frac{1}{4}$
- B) $11\frac{1}{3}$
- C) $11\frac{1}{6}$
- D) $11\frac{2}{5}$

22. A fraction whose numerator is greater than its denominator is called:

- A) Proper fraction
- B) Improper fraction
- C) Unit fraction
- D) Mixed fraction

23. By selling a stool for ₹67.50, a carpenter loses 10%. What per cent would he gain or lose by selling it for ₹82.50?

- A) Gain, 10%
- B) Loss, 12%
- C) Gain, 20%
- D) Loss, 25%

24. A garden has 2000 trees. 12% of these are mango trees, 18% lemon, and the rest are orange trees. Find the number of orange trees.

- A) 1400
- B) 1500
- C) 1200
- D) 1300

25. How many symbols are used in the standard Roman numeral system?

- A) 5
- B) 7
- C) 6
- D) 8

26. Which of the following decimals is equal to one-half?

- A) 1.50
- B) 0.25
- C) 0.50
- D) 0.75

27. Find the average of three quantities a, b and c.

- A) $(a + b + c)/3$
- B) $(a + b)/2 = c$
- C) $(a + b - c)/3$
- D) $(a - b - c)/3$

28. The average age of 5 boys is 16 yr, of which the average age of 4 boys is 16 yr 3 months. The age of the fifth boy is

- A) 15 yr
- B) 15 yr 6 months
- C) 15 yr 4 months
- D) 15 yr 2 months

29. Anaya poured $3\frac{7}{8}$ cups of Rasna each into 8 glasses. What was the total amount of Rasna Anaya poured into the 8 glasses?

- A) 31 cups
- B) 32 cups
- C) 10 cups
- D) 29 cups

30. If two ratios are equal, they form a:

- A) Fraction
- B) Proportion
- C) Difference
- D) Product

31. Which of the following Roman numeral symbols is never repeated while representing Hindu-Arabic numerals?

- A) X
- B) M
- C) C
- D) D

32. The average of a set of numbers always lies:

- A) Above the largest number
- B) Below the smallest number
- C) Between the smallest and the largest numbers (inclusive)
- D) Equal to the largest number

33. Simplify the expression $6/5 \times 3/2 \div 4/8 - 2/3 + 1/5$

- A) $1\frac{2}{15}$
- B) $48/17$
- C) $3\frac{2}{15}$
- D) $8\frac{7}{5}$

34. In BODMAS, the letter "O" stands for:

- A) Order or Of
- B) Output
- C) Over
- D) Operation

35. The difference between the place value and the face value of the digit 7 in 208947 is:

- A) 7
- B) 14
- C) 63
- D) 0

36. Average is also known as:

- A) Mode
- B) Mean
- C) Median
- D) Range

37. If $A : B = 11 : 12$, $B : C = 13 : 14$ and $C : D = 15 : 16$, find $A : D$.

- A) 715 : 896
- B) 718 : 890
- C) 896 : 700
- D) 718 : 895

38. In the given number 890436, if you write 0 in place of 4, by how much will the resulting number be less than the given number?

- A) 40
- B) 400
- C) 436
- D) 36

39. The ratio between two numbers is 12 : 13. If each number is reduced by 20, the ratio becomes 2 : 3. Find the numbers.

- A) 30, 26
- B) 26, 28
- C) 24, 26
- D) 25, 27

40. At what rate will a sum double itself in 16 yr?

- A) $27/4\%$
- B) $17/4\%$
- C) $19/4\%$
- D) $25/4\%$

41. Which percentage is equal to one whole?

- A) 10%
- B) 50%
- C) 75%
- D) 100%

42. Simplify the expression $(3+3+3+3) \div 3 \div (5+5+5+5) \div 5$

- A) 3
- B) 5
- C) 7
- D) 1

43. Which of the following formula is correct?

- A) $P = A / (100 + rt)$
- B) $SI = PRT / 10$
- C) $R = 100 \times SI / (A \times t)$
- D) None of the above

44. Which one of the following statements is true?

- A) All even numbers are composite numbers
- B) All odd numbers are prime numbers
- C) There are infinite prime numbers
- D) A prime number can be written as the product of more than two natural numbers.

45. In the ratio 4:13, the number 13 is called the:

- A) Antecedent
- B) Consequent
- C) Sum of the terms
- D) Product of the terms

48. Which of the following statements about ratio and proportion are correct?

- A) The first term of a ratio is called the antecedent.
- B) Equal ratios form a proportion.
- C) The second term of a ratio is called the consequent.
- D) Every pair of ratios forms a proportion.

49. Which of the following statements about Roman numerals are correct?

- A) The symbol V is never repeated in standard Roman numerals.
- B) The symbol X can be repeated up to three times consecutively.
- C) There are 7 basic symbols in the Roman numeral system.
- D) The Roman numeral for 50 is L.

50. A sum of ₹1000 is invested at 10% simple interest per annum for 2 years. Which of the following statements are correct?

- A) The principal is ₹1000.
- B) The simple interest for one year is ₹100.
- C) The total simple interest for 2 years is ₹200.
- D) The amount after 2 years is ₹1200.

Questions 46–50

Questions 47–51: There are two or more correct options.

46. Which of the following statements about average are correct?

- A) Average is obtained by dividing the sum of observations by the number of observations.
- B) The average may not be one of the observations.
- C) The average can be a decimal number.
- D) The average is always equal to the largest observation.

47. A shopkeeper buys a watch for ₹400 and sells it for ₹460. Which of the following statements are correct?

- A) The shopkeeper makes a profit.
- B) The profit is ₹60.
- C) The Selling Price is greater than the Cost Price.
- D) The Cost Price is ₹460.
